

APPENDIX

In 1975-76 experts of ELGI performed electrical soundings and well logging to help to solve water supply problems of the Ground Water Development Administration of Iraq.

The observations were carried out by Hungarian exported GE-27 resistivity and K-500 well logging equipments.

The training of the local personnel was an essential part of the program.

*

The Mineral Exploration Expedition in Mongolia continued its work according to the previously determined plans.

*

Publications: Annual Report 1975; Annual Report 1975 (Geophysical Observatory, Tihany); Earth Tide Observations by Askania Gravitymeters at the Geodetical Observatory Pecny (Czechoslovakia); Geophysical Transactions Vol. 24; and Supplement 2.
